Troubleshooting:

1. If an echo is present, lower the volume on the head unit, or reposition the microphone further away from the speakers if necessary.
2. During a call, the volume is independent from the source volume.
3. Please verify in call volume setting on your phone. This can affect Bluetooth in some phones.
4. For instructions on how to pair to the device from your phone, please refer to your phone's owners manual.
5. Display of Phonebook, Received Calls, Missed Calls, and Dialed Calls varies from phone to phone and by your service provider.
6. Phone synchronization speed varies from phone to phone.
7. Phone synchronization begins as soon as the pairing process is complete.
8. Access to Phonebook, Received Calls, Missed Calls, and Dialed Calls is available after phone synchronization is complete.
9. 12 Key direct dialing is only available on 2007 and newer Alpine AV head units.

Definitions:

1. HFP - Hands Free Profile allows Bluetooth phone to be used with speaker. Commonly seen with car kits.
2. PBAP - PhoneBook Access Profile allows viewing of phonebook through Bluetooth device.
3. Autoconnect - automatically reconnects Bluetooth device with cell phone when cycling power.
4. HSP - Head Set Profile enables a wireless headset to be used with a Bluetooth phone.
5. Call History - the Bluetooth device will show the phones history of calls.
6. A2DP - Advanced Audio Distribution Profile allows for streaming stereo audio from phone to Bluetooth device.
7. ACRCP - Audio/Video Remote Control Profile controls playback of audio and/or video including play, pause, stop, etc.

Disclaimer:

1. Please visit your local Alpine dealer to verify compatibility of your phone.
