BLUETOOTH 1.600 FIRMWARE UPDATE

The CDE-164bt can be updated with the usb port on the front of the radio face
Download the bin file and save to your desktop for easy access

The downloaded bin file *(15MY_1DINHU_AE_102E.bin)* is in compressed ZIP format

The contents of the download need to be extracted to a freshly formatted
USB memory stick *(FAT32)*

Do not use the compressed file to update the CDE-164bt it cannot recognize the file.

- Once the unzipped bin file has been copied to the USB memory stick power the radio
  On and change the source to USB, plug the memory stick into the USB port of the radio
- Press the BAND button and Preset #3 at the same time, release the buttons and
  Press the PLAY/PAUSE button
- *(Update NO)* will be displayed on the LCD screen
- Rotate the volume knob to display *(Update YES)*
  Then press and release the volume knob to select *(YES)*
- *(UPDATE START)* will be displayed then the screen will change to *(UPDATING 00%)*
  You should see the percentage increase as the radio is updating
- The update process should take no more than 5 to 10 minutes
  If update is successful you will see *(UPDATED)* on the screen for 5 seconds
- The screen will then display the *(M-SUM 0EB6)* and *(U-SUM 7C4D)* information
- At this time turn the vehicle's ignition off and let the radio power down
  Turn the vehicle's ignition back on and the radio is now ready for use
